1. **Current Project Status**
   Level 1 concrete slab on grade is finished. Level 2 concrete slabs are complete at the west end of building. Those on the east end will occur over the next six weeks. The steam tunnel connecting the new facility to the existing steam distribution tunnel is proceeding at the east end of the site, close to Stairs House.

2. **Dalplex Parking Lot Disruption (month of May)**
   The Fitness Centre sanitary and storm sewers will be connected to the existing Dalplex lines. This will involve trenching diagonally across the Dalplex parking lot. Work will begin in the southwest corner of the parking lot (by the containers) and progress in a north-easterly direction towards the construction tower crane. The parking lot will remain open but will have a reduced number of available parking spots. The work is scheduled to begin week of May 1 and is expected to take two to three weeks to complete. Should bedrock be encountered some rock breaking will occur. Traffic control will be in effect, so please pay attention to changes in traffic flow within the lot during this work.

3. **Upcoming Activity**
   During the month of May the first of nine truckloads of structural steel will arrive on site. Erection of this structural steel will form level 2 of the Fitness Centre. Once steel is complete the shape of the facility will become evident.

4. **Other**
   Please feel free to share this notice with anyone you feel may find it of interest. This notice will be added to the project website ([fm.dal.ca](http://fm.dal.ca) and click link to Campus Development).
