

# SUSTAINABLE TRANSPORTATION SUMMARY

2025-2026

Data is sourced from annual sustainability survey, DalTRAC reports, and commuter GHG emissions data.

## How does our community commute to and from Dalhousie?

78%

### Use Sustainable Transport

On Halifax campuses and 32% on the Agriculture Campus.  
All campus transportation methods, excluding single-occupancy fossil fuel powered vehicles, are considered sustainable.

## How do people travel between Halifax campuses?

62%

### Prefer walking

As the primary option for travelling between campuses in Halifax, including Studley, Carleton, Sexton, and off-campus health facilities.

## How about **secondary modes** (less than 30% of the time) for daily commuting?

This question helps us understand the different ways respondents use transportation in their daily lives.

### Public Transportation

Was the **top secondary mode**, used by **27%** of respondents.

### Walking

Ranked **second** as a secondary mode at **21%**.

Secondary modes are a great way to introduce sustainable options to your commute.  
Try choosing a sustainable option for your next trip!

## Calls to Action: How Can We Inspire Sustainable Transportation Choices?

Ideas for sustainable transportation came from 289 survey respondents.

### Improve Public Transit

Roughly  $\frac{2}{3}$  of suggestions asked for improved wait times, direct bus routes, and less time spent stuck in traffic.

### Improve Bike Infrastructure

Respondents asked for expanded cycling infrastructure to increase safety and messaging to improve driver attitudes towards cyclists.
